

## Abstract

A snowmobile having an adjustable ski stance. The snowmobile including a central  
5 chassis from which an endless track is suspended and straddle type seat is supported. A pair of  
skis are coupled to a front suspension and are operatively linked to a handlebar assembly for  
steering the snowmobile. The skis are coupled to the snowmobile by spindles coupled to the  
suspension and each ski. A bushing with an offset flange couples the spindle to the ski and  
provides for ski stance adjustment.
